- 1. Transmittal of the translation to the applicant.
  - The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter I).
  - The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter II).
- 2. Transmittal of the copy of the translation to the designated or elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation:

None

The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KR, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II).

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

#### 2. Citations and explanations:

1 In the present report, reference is made to the following documents:

D1 = FR 2 165 030 A (FAIVELEY SA; SNCF; BRISSONNEAU &; LOTZ) 3 August 1973 (1973-08-03)

2.1 The document D1 is considered to be the closest prior art. It discloses (the references in parentheses relate to this document):

a retractable step (13) for entering and exiting rail vehicles. In order to bridge the gap between the vehicle and the platform, a surface upon which passengers can walk (the retractable step) is extended from the vehicle in an essentially linear direction, the retractable step comprising an apparatus (62, 65, 67, 68) having at least one sensor, which apparatus (62, 65, 67, 68) is intended to prevent a collision with obstacles during extension,

from which the subject matter of the independent claim 1 differs by virtue of the fact that:

the apparatus comprises a strip which is displaceably connected to the retractable step, extends essentially

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

over the entire length of the retractable step and, when in an active state, is located, in essence, under the leading edge of the retractable step, and the said apparatus also comprises at least one sensor that detects either the position of the strip relative to the retractable step or the force transferred from the strip to the retractable step.

- 2.2 The subject matter of claim 1 is thus novel (PCT Article 33(2)).
- 3.1 The problem addressed by the present invention consists in correct and reliable positioning of the retractable step in all possible situations. For this purpose, satisfactory and inexpensive detection of the possible obstacles on the platform and, when the retractable step is extended during a halt of the vehicle, of the change in height of the retractable step are to be carried out. Damage to the retractable step or injury of the passengers is thus precluded.
- 3.2 The solution which is proposed in claim 1 of the present application for this object involves an inventive step (PCT Article 33(3)) for the following reasons.

The retractable step is equipped with a strip that extends over the entire length and is displaceably connected under the leading edge. The position of the strip and/or the transferred force are/is detected with at least one sensor. Monitoring of the detection space is thus also ensured during extension of the retractable step.

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

A combination of features of this type is neither provided nor made obvious by the known prior art.

- 4. Claims 2-6 are dependent on claim 1 and thus likewise meet the PCT requirements for novelty and inventive step.
- 5. Contrary to PCT Rule 5.1(a) (ii), the description does not cite D1 or indicate the relevant prior art disclosed therein.
